

## GPS Trackdown for Android

### Helpful Hints – What is ICE?

1. **ICE** (In Case of Emergency) is a program that enables first responders, such as paramedics, firefighters, and police officers, as well as hospital personnel, to contact the next of kin of the owner of a mobile phone to obtain important medical or support information. GPS Trackdown can transmit your current location to your ICE contact. We also support the language-independent E.123 recommended ICE format (e.g. "01Anna" or "01Spouse").
2. Create a new **Phone** contact with the display name ICE. (Note that the contact must be a "Phone" or "Local" contact). Ensure that you define an email address, a mobile number and optionally a work and home number.
3. Let your ICE contact know that you are using GPS Trackdown and that he or she has been designated as your emergency contact. Read our **Helpful Hints** regarding **Remote Trackdown** and **Panic Trackdown**.
